SUMMARY

Full Stack Engineer with 5+ years of experience developing and deploying web applications using Java, JavaScript, TypeScript, React, Node.js, PHP, Spring Boot, MySQL, and MongoDB. Experienced in independently delivering production CMS and digital library platforms, automating business workflows, maintaining data integrity, and testing web systems with careful attention to quality and documentation.

SKILLS

Java, JavaScript, TypeScript, React, Node.js, PHP, MySQL, MongoDB, HTML5, CSS, Spring Boot, Programming

WORK EXPERIENCE

Eagle Express Group | Administrative Assistant Jul 2025 - Present

Delivered exceptional customer support by proactively resolving complex delivery discrepancies and shipment delays, ensuring high levels of client satisfaction.

Acted as the primary point of contact for client inquiries, providing clear and professional communication to bridge the gap between logistics operations and customer needs.

Maintain internal web systems and conduct functional testing to ensure digital tools used for customer tracking remain accurate and accessible.

Streamline administrative documentation by meticulously managing client records and shipment data for quick retrieval and issue resolution.

Monitor daily shipment workflows and identify recurring issues to implement reliable customer-facing processes independently.

Octopus InfoTech Limited | Web/App Developer Nov 2021 - Aug 2024

Tech Stack: Java, JavaScript, TypeScript, React, Node.js, MySQL, MongoDB, Spring boot, HTML5, CSS

Developed a high-performance Content Management System (CMS) and digital library platform currently deployed across 100+ primary and secondary schools in Hong Kong.

Streamlined the order fulfillment lifecycle for major book suppliers, achieving a 65% reduction in processing time by replacing manual workflows with automated digital systems

Optimized data integrity and retrieval speeds for massive book catalogs by implementing efficient MySQL and MongoDB database schemas

Sing Tao News Corporation Limited | Programmer Jan 2020 - Oct 2021

Tech Stack: PHP, Java, JavaScript, TypeScript, MySQL, MongoDB, HTML5, CSS

Spearheaded the final development phase of an internal CMS independently, successfully transitioning the system to production to support high-traffic news operations.

Served as the primary technical liaison, directly collaborating with internal departments to gather, analyze, and translate editorial requirements into robust technical specifications.

Orchestrated the deployment of full-stack solutions using PHP, Java, and JavaScript, ensuring the platform could handle the performance demands of a 24/7 news cycle.

Streamlined editorial workflows by implementing custom features that improved content publishing speed and overall User Experience (UX).

Managed database architecture and troubleshooting using MySQL and MongoDB to maintain data integrity and system uptime

New World Development Company Limited | IT Support Internship Aug 2019 - Dec 2019

Resolved daily hardware and software technical issues for end-users, ensuring minimal downtime and maintaining high operational productivity.

Assisted in large-scale system migrations and hardware upgrades, including the installation and configuration of new workstations and peripheral equipment.

Provided comprehensive technical support for OS deployment, software patches, and connectivity issues across multiple departments.

Maintained IT inventory records and performed routine file maintenance to ensure data integrity and organized resource tracking.

Developed basic troubleshooting guides and technical documentation to help end-users resolve common issues independently.

EDUCATION

CanTek | Web Development | Toronto, Canada | Aug 2023

Coventry University | BSc, Computing | Hong Kong | Jul 2021

Hong Kong Institute of Vocational Education | Higher Diploma, Software Engineering | Hong Kong | Jul 2018
