PROFESSIONAL SUMMARY

Dedicated and experienced programmer with a successful 3-year tenure in developing eLearning courses and web applications. Proficient in HTML, CSS, Java, JavaScript, PHP, SQL, Android, and React, delivering high-quality software solutions. Skilled in gathering and analyzing business requirements, collaborating effectively with cross-functional teams.

WORK HISTORY

Octopus Infotech Limited – Programmer

11/2021 - Present

(Java, JavaScript, TypeScript , React, NodeJs, MYSQL, MongoDB, Spring boot, HTML, CSS)

- Collaborated with the Hong Kong book supplier to develop a comprehensive Content Management System (CMS) for managing the book purchase process.
- Implemented interactive and engaging features to streamline the ordering and management process for schools and libraries.
- Conducted comprehensive testing and debugging, ensuring software quality and reliability.
- Gathered and analyzed business requirements, developing detailed functional and technical specifications.
- Collaborated closely with product and design teams, contributing to project scope and innovation.

Sing Tao News Corporation Limited – Programmer

01/2020 – 10/2021

(PHP, JavaScript, MYSQL, HTML, CSS)

- Development of an internal Content Management System (CMS) to replace the outdated system, resulting in improved efficiency and streamlined content editing processes.
- Collaborated with cross-functional teams to analyze business requirements and successfully translated them into detailed technical specifications.
- Provided exceptional technical support and troubleshooting for existing systems and news websites, promptly resolving issues to ensure seamless operations.
- Successfully managed multiple tasks and projects simultaneously, meeting tight deadlines and delivering results within time constraints.
- Maintained strong communication with stakeholders, ensuring their needs were met, and delivering solutions that aligned with business goals.
